

Q & A BRAINSTORMING

NEW YORK (ALBANY)

Engineering & Technology

What types of engineers were involved in designing your City? How did the engineering design process help you create and develop your Future City?

Teamwork & Project Management

How did your team decide how to divide responsibilities?
Did any of your team's initial goals evolve as you worked on your project?

Electrify Your Future

Is your city an extension of a land based city or is it a fully floating city and why? What innovative or futuristic materials did you use in the construction of your floating city? How does your city withstand extreme weather, like the pressures of storms and water?

Q&A Brainstorming

City Designs, Systems and Operations

How does your City support lowincome or vulnerable residents? What factors did you consider while laying out the zones in your City? Are the zones separate or mixeduse?

Collaboration

Can everyone on the project team answer all questions about your City and Model?
Can the presenters rotate answering questions?

Use of Model

Does your model align with your answers to the above questions?
Can you provide examples from your model to answer questions?
